Incidence
Incidence is the number of new cancer cases in a given period, and is reported as the number of cancer cases per 100,000 population. The incidence of breast, lung, lower gastrointestinal (GI) and urological cancers are reported here.

In 2013, there were 116 breast cancers diagnosed in NHS Hambleton, Richmondshire and Whitby CCG
● The incidence of breast cancer is significantly lower than the England average, but higher than the CCG with the lowest incidence in the cluster. (NHS South West Lincolnshire CCG)

In 2013, there were 114 lung cancers diagnosed in NHS Hambleton, Richmondshire and Whitby CCG
● The incidence of lung cancer is significantly lower than the England average, but higher than the CCG with the lowest incidence in the cluster. (NHS High Weald Lewes Havens CCG)

In 2013, there were 118 lower GI cancers diagnosed in NHS Hambleton, Richmondshire and Whitby CCG
● The incidence of lower GI cancer is lower than the England average, but higher than the CCG with the lowest incidence in the cluster. (NHS High Weald Lewes Havens CCG)

In 2013, there were 230 urological cancers diagnosed in NHS Hambleton, Richmondshire and Whitby CCG
● The incidence of urological cancer is higher than the England average, and higher than the CCG with the lowest incidence in the cluster. (NHS Stafford and Surrounds CCG)

Mortality
The mortality rate is the number of deaths in a given period per 100,000 population. The mortality rates from breast, lung, lower gastrointestinal (GI) and urological cancers are reported here.

In 2013, there were 27 deaths from breast cancer in NHS Hambleton, Richmondshire and Whitby CCG
● The mortality rate from breast cancer is lower than the England average and is the CCG with the lowest mortality rate in the cluster.

In 2013, there were 100 deaths from lung cancer in NHS Hambleton, Richmondshire and Whitby CCG
● The mortality rate from lung cancer is lower than the England average, but higher than the CCG with the lowest mortality rate in the cluster. (NHS South Lincolnshire CCG)

In 2013, there were 44 deaths from lower GI cancers in NHS Hambleton, Richmondshire and Whitby CCG
● The mortality rate from lower GI cancer is lower than the England average, but higher than the CCG with the lowest mortality rate in the cluster. (NHS West Suffolk CCG)

In 2013, there were 52 deaths from urological cancer in NHS Hambleton, Richmondshire and Whitby CCG
● The mortality rate from urological cancer is lower than the England average, and the CCG with the lowest mortality rate in the cluster.

Survival
● For ages 15-99 one year survival from all cancers is higher than the England average, but lower than the CCG with the highest survival in the cluster (NHS West Suffolk CCG)
● For ages 55-64 one year survival from all cancers is higher than the England average but lower than the CCG with the highest survival in the cluster (NHS West Suffolk CCG)
● For ages 75-99 one year survival from all cancers is higher than the England average, but lower than the CCG with the highest survival in the cluster (NHS West Suffolk CCG)

Key on page 2
CCG cancer profiles

Screening

- 78.4% of females in NHS Hambleton, Richmondshire and Whitby CCG, aged 50-70, were screened for breast cancer within the last 36 months, this is significantly higher than the England average, but significantly lower than the best performing CCG in the cluster. (NHS South Lincolnshire CCG)
- 71.9% of females, aged 50-70, were screened for breast cancer within 6 months of invitation. This is lower than the England average, but significantly lower than the best performing CCG in the cluster. (NHS South Lincolnshire CCG)
- 78.8% of females, aged 25-64, attending cervical screening within target periods, this is significantly higher than the England average, but lower than the best performing CCG in the cluster. (NHS South Lincolnshire CCG)
- 65.6% of people, aged 60-69, were screened for bowel cancer within 30 months, this is significantly higher than the England average, but lower than the best performing CCG in the cluster. (NHS South Norfolk CCG)
- 65.3% of people, aged 60-69, were screened for bowel cancer within 6 months of invitation, this is significantly higher than the England average, but lower than the best performing CCG in the cluster. (NHS South Norfolk CCG)

Routes to Diagnosis

- 3.8% of breast cancers in NHS Hambleton, Richmondshire and Whitby CCG were diagnosed via the emergency route; this is lower than the England average, but higher than the CCG with the lowest rate in the cluster (NHS Herefordshire CCG).
- 21.4% of colorectal cancers in NHS Hambleton, Richmondshire and Whitby CCG were diagnosed via the emergency route; this is lower than the England average, but higher than the CCG with the lowest rate in the cluster (NHS South Norfolk CCG).
- 31.3% of lung cancers in NHS Hambleton, Richmondshire and Whitby CCG were diagnosed via the emergency route; this is significantly lower than the England average, but higher than the CCG with the lowest rate in the cluster (NHS South Norfolk CCG).
- 5.5% of prostate cancers in NHS Hambleton, Richmondshire and Whitby CCG were diagnosed via the emergency route; this is significantly lower than the England average, but higher than the CCG with the lowest rate in the cluster (NHS South Norfolk CCG).

Staging

- 88.8% of breast cancers were staged; this is higher than the England average but lower than the best performing CCG in the cluster (NHS West Suffolk CCG).
- 94.7% of lung cancers were staged; this is significantly higher than the England average, but lower than the best performing CCG in the cluster (NHS West Suffolk CCG).
- 86.7% of colorectal cancers were staged; this is higher than the England average, but lower than the best performing CCG in the cluster (NHS West Suffolk CCG).
- 92.4% of prostate cancers were staged; this is significantly higher than the England average, but significantly lower than the best performing CCG in the cluster (NHS West Suffolk CCG).

Key

- Not significantly different to England or the best / worst CCG in the cluster
- Significantly better than England and/or the best performing CCG in the cluster
- Significantly worse than England and/or the best CCG in the cluster

Proportion of emergency admissions - 2006-10
Proportion of cancers staged and the proportion of those staged early (Stages 1&2)

2013 Breast cancer staging, ordered by proportion staged.

2013 Lung cancer staging, ordered by proportion staged.

2013 Colorectal cancer staging, ordered by proportion staged.

2013 Prostate cancer staging, ordered by proportion staged.
Using ONS CCG Cluster groups, as used in the Commissioning for Value packs and tool, the 10 CCGs which are most similar to

**03D NHS Hambleton, Richmondshire and Whitby CCG**

are:

- 05F NHS Herefordshire CCG
- 99D NHS South Lincolnshire CCG
- 07K NHS West Suffolk CCG
- 06Y NHS South Norfolk CCG
- 05N NHS Shropshire CCG
- 04Q NHS South West Lincolnshire CCG
- 05V NHS Stafford and Surrounds CCG
- 99K NHS High Weald Lewes Havens CCG
- 10L NHS Isle of Wight CCG
- 02Y NHS East Riding of Yorkshire CCG
