Incidence
Incidence is the number of new cancer cases in a given period, and is reported as the number of cancer cases per 100,000 population. The incidence of breast, lung, lower gastrointestinal (GI) and urological cancers are reported here.

In 2013, there were 154 breast cancers diagnosed in NHS Airedale, Wharfedale and Craven CCG
- The incidence of breast cancer is higher than the England average, and higher than the CCG with the lowest incidence in the cluster. (NHS South West Lincolnshire CCG)

In 2013, there were 130 lung cancers diagnosed in NHS Airedale, Wharfedale and Craven CCG
- The incidence of lung cancer is lower than the England average, but higher than the CCG with the lowest incidence in the cluster (NHS South Worcestershire CCG)

In 2013, there were 113 lower GI cancers diagnosed in NHS Airedale, Wharfedale and Craven CCG
- The incidence of lower GI cancer is lower than the England average, and is the CCG with the lowest incidence in the cluster.

In 2013, there were 210 urological cancers diagnosed in NHS Airedale, Wharfedale and Craven CCG
- The incidence of urological cancer is lower than the England average, but higher than the CCG with the lowest incidence in the cluster. (NHS South Worcestershire CCG)

Mortality
The mortality rate is the number of deaths in a given period per 100,000 population. The mortality rates from breast, lung, lower gastrointestinal (GI) and urological cancers are reported here.

In 2013, there were 38 deaths from breast cancer in NHS Airedale, Wharfedale and Craven CCG
- The mortality rate from breast cancer is higher than the England average and higher than the CCG with the lowest mortality rate in the cluster (NHS South Kent Coast CCG)

In 2013, there were 103 deaths from lung cancer in NHS Airedale, Wharfedale and Craven CCG
- The mortality rate from lung cancer is lower than the England average, but higher than the CCG with the lowest mortality rate in the cluster. (NHS Harrogate and Rural District CCG)

In 2013, there were 51 deaths from lower GI cancers in NHS Airedale, Wharfedale and Craven CCG
- The mortality rate from lower GI cancer is lower than the England average, but higher than the CCG with the lowest mortality rate in the cluster. (NHS Great Yarmouth & Waveney CCG)

In 2013, there were 61 deaths from urological cancer in NHS Airedale, Wharfedale and Craven CCG
- The mortality rate from urological cancer is lower than the England average, but higher than the CCG with the lowest mortality rate in the cluster. (NHS West Essex CCG)

Survival
- For ages 15-99 one year survival from all cancers is higher than the England average, and is the CCG with the highest survival in the cluster.
- For ages 55-64 one year survival from all cancers is higher than the England average and is the CCG with the highest survival in the cluster.
- For ages 75-99 one year survival from all cancers is higher than the England average, but lower than the CCG with the highest survival in the cluster (NHS Harrogate and Rural District CCG)
CCG cancer profiles

Screening
- 70.5% of females in NHS Airedale, Wharfedale and Craven CCG, aged 50-70, were screened for breast cancer in 36 months, this is significantly lower than the England average, and significantly lower than the best performing CCG in the cluster. (NHS Great Yarmouth & Waveney CCG)
- 67.5% of females, aged 50-70, were screened for breast cancer within 6 months of invitation; this is significantly lower than the England average, and significantly lower than the best performing CCG in the cluster. (NHS Newark & Sherwood CCG)
- 76.8% of females, aged 25-64, attending cervical screening within target period; this is significantly higher than the England average, but significantly lower than the best performing CCG in the cluster. (NHS Newark & Sherwood CCG)
- 63.2% of people, aged 60-69, were screened for bowel cancer in last 30 months; this is significantly higher than the England average, but lower than the best performing CCG in the cluster. (NHS Newark & Sherwood CCG)
- 63.3% of people, aged 60-69, were screened for bowel cancer within 6 months of invitation; this is significantly higher than the England average, but lower than the best performing CCG in the cluster. (NHS Newark & Sherwood CCG)

Routes to Diagnosis
- 4.2% of breast cancers in NHS Airedale, Wharfedale and Craven CCG were diagnosed via the emergency route; this is lower than the England average, but higher than the CCG with the lowest rate in the cluster (NHS Harrogate and Rural District CCG).
- 23% of colorectal cancers in NHS Airedale, Wharfedale and Craven CCG were diagnosed via the emergency route; this is lower than the England average, but higher than the CCG with the lowest rate in the cluster (NHS Harrogate and Rural District CCG).
- 41.3% of lung cancers in NHS Airedale, Wharfedale and Craven CCG were diagnosed via the emergency route; this is higher than the England average, but significantly higher than the CCG with the lowest rate in the cluster (NHS Harrogate and Rural District CCG).
- 11.2% of prostate cancers in NHS Airedale, Wharfedale and Craven CCG were diagnosed via the emergency route; this is higher than the England average but significantly higher than the CCG with the lowest rate in the cluster (NHS South Worcestershire CCG).

Staging
- 93.5% of breast cancers were staged; this is significantly higher than the England average but lower than the best performing CCG in the cluster (NHS West Essex CCG)
- 81.6% of lung cancers were staged; this is lower than the England average, but significantly lower than the best performing CCG in the cluster (NHS Great Yarmouth & Waveney CCG)
- 90.4% of colorectal cancers were staged; this is significantly higher than the England average, but lower than the best performing CCG in the cluster (NHS Great Yarmouth & Waveney CCG)
- 95.8% of prostate cancers were staged; this is significantly higher than the England average, but lower than the best performing CCG in the cluster (NHS Great Yarmouth & Waveney CCG)

Key
- Not significantly different to England or the best / worst CCG in the cluster
- Significantly better than England and/or the best performing CCG in the cluster
- Significantly worse than England and/or the best CCG in the cluster

Proportion of cancers staged and the proportion of those staged early (Stages 1&2)

2013 Breast cancer staging, ordered by proportion staged.

2013 Lung cancer staging, ordered by proportion staged.

2013 Colorectal cancer staging, ordered by proportion staged.

2013 Prostate cancer staging, ordered by proportion staged.
CCG cancer profiles

Using ONS CCG Cluster groups, as used in the Commissioning for Value packs and tool, the 10 CCGS which are most similar to

**02N NHS Airedale, Wharfedale and Craven CCG** are:

- 02T NHS Calderdale CCG
- 10A NHS South Kent Coast CCG
- 05D NHS East Staffordshire CCG
- 09C NHS Ashford CCG
- 03E NHS Harrogate and Rural District CCG
- 07H NHS West Essex CCG
- 04Q NHS South West Lincolnshire CCG
- 06M NHS Great Yarmouth & Waveney CCG
- 05T NHS South Worcestershire CCG
- 04H NHS Newark & Sherwood CCG
